The UNIBLOCK range of Mineral Trace Element Blocks has been tried & tested. Numerous field trials & scientific trials carried out at University College Dublin, have proved the effectiveness of the uniblock range of mineral Blocks in providing essential minerals & trace elements to livestock

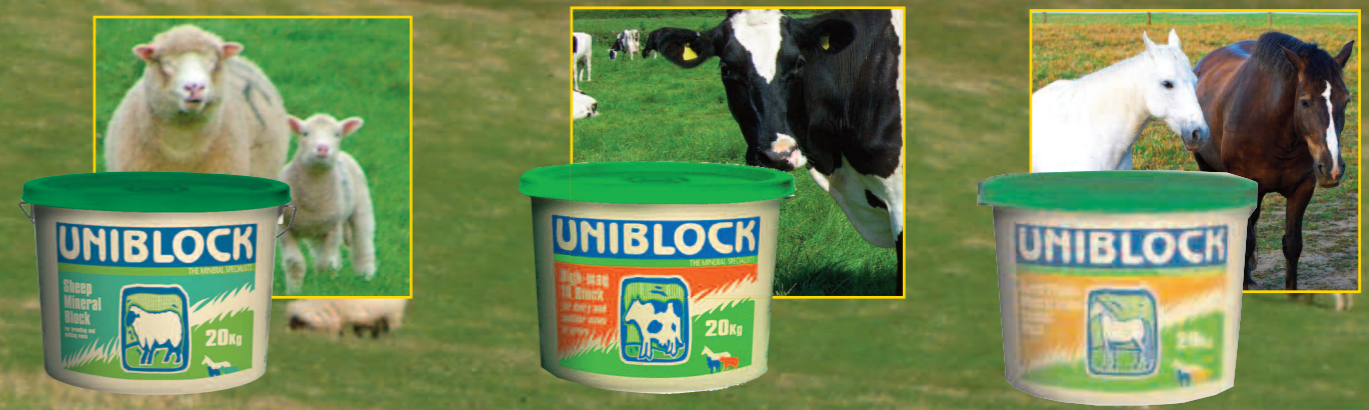

TRIALS

- ** Trials conducted with Avonmore Coop Ireland (1991)
- *** UCD trials Ireland 1991, 1999
- **** SAC trials Scotland 2004
- ***** Teagasc (Irish farm advisory service) monitor farm trials 2001-3 costs based on current (June 2008) RRP & intakes
- *

NOTES

- No other minerals or products containing minerals should be fed with Uniblock products.
- Over consumption can occur when minerals are first introduced.
- Persistent over consumption is an indication of a shortage of good quality grass or forage.
- Removing the product and increasing forage availability or introducing dry feed should eliminate the problem
- Soft buckets should be returned to the store

ALL UNIBLOCK PRODUCTS ARE MANUFACTURED TO HACCP AND UFAS STANDARDS

MAGNESIUM PRODUCTS

Magnesium is unpalatable so ensure you buy products with high molasses levels. Place two buckets in every paddock. Allow access throughout grazing season

HIGH MAG 10

- Molasses to magnesium ratio 5:1
- High in Copper
- Maximum levels of I, SE, Co, Mn, & Zn
- Feeding rate 200g/hd/day.
- **Cost* 15 cent/hd/day (11p)**

Our customers number 1 choice

HIGH MAG 15

- High in Magnesium, ideal for spring/autumn
- Feeding rate 150g/hd/day
- **Cost *15 cent/hd/day (11p)**

**Cattle Only
Do Not Feed To Sheep**

HERD MINDER

- The only 3 in 1 bucket for farmers who calve all year round
- Protects against milk fever, grass tetany/staggers & improves fertility

**Cattle Only
Do Not Feed To Sheep**

ECONO MAG 15%

- Ideal for sheep/cattle
- 15% Mg
- Molasses to magnesium ratio 3:1
- High levels of I, Se, Co, Mn and Zn
- Feeding rate 25-150g/hd/day
- **Cost* 1-14cent/hd/day (6p)**

LIFELINE RANGE

The final weeks of pregnancy for the mother & especially her young are more important than anything that happens after birth. Animals that get a good start in life will continue to do well. Nothing can replace good quality colostrum & strong lively new born young

LIFELINE PRECALVER

The only precalving mineral for the calf as well as the cow

- Better colostrum for your calf, better recovery by cow after calving
- Contains immuno - stimulants as well as minerals
- Contains colostrum boosters shown to double antibody levels
- Available in bag or bucket
- Feeding rate 100g - 200g /day
- **Cost 9 cent/hd/day (7p)**

**Cattle Only
Do Not Feed to Sheep**

LIFELINE LAMB & EWE

The only product for the lamb as well as the ewe

- Boost ewe colostrum quality by 25%
- Recommended for easy care systems
- Feed 3-4 weeks before lambing
- Trials with SAC resulted in a significant increase in ewe colostrum antibody levels****
- Lambs are lively & alert
- Feeding rate 150g/hd/day
- **Cost 9-10 cent/ewe/day (9p)**

HORSE

Fast growing horses need minerals especially copper to avoid problems in later life. The horse is a trickle feeder consuming to forage for up to 16hrs in any day. This continuous feeding suits the horses digestive system whereas large set meal feeding does not.

LIFELINE HORSE

NEW

- The only prefoaling treatment to enhance colostrum quality & both foal & mares health
- Shown to improve mare and foal health after foaling

GARLIC

NEW

- For horses, cattle & sheep to reduce fly numbers around stock
- Fully mineralised
- Ideal for in calf heifers

UNIBLOCK HORSE BLOCK

- Designed in conjunction with Ireland's Lyons estate & UCD's vets collage.***
- Very high in copper
- Time-lapse photography proved consistent intakes
- Blood, hair & hoof analysis showed significant increases in Cu, Se & Zn
- Feeding rate 75g/horse/day
- **Cost* 13 cent/horse/day**
- **Do Not Feed To Sheep**

TRICKLE COOL BLOCK

- Allows for continued access & little as well as often feeding.
- The most natural way to put condition on young horses or to feed mares with foals.
- Eliminates ALL of the negative effects hard feed CAN HAVE on digestion & behaviour.
- 1kg replaces up to 2kg of hard feed a day
- Feeding rate 15g/kg lwt/ day
- **Cost * 60cent/horse/day (40p)**
- **Do Not Feed To Sheep**

SHEEP

Using licks to provide energy, protein & trace elements such as cobalt will reduce your annual work load. Using the full range of Uniblock licks throughout the year will cost as little as €8/ewe & this will replace all or most of your dry feed, creep & mineral drench needs. Independent trials have shown increase in litter size & higher conception to 1st service in response to free access to Uniblock sheep mineral. Post weaning weight were also improved****

UNITUP

- High in energy & fish oils to increase litter size at lambing
- For flushing out more lambs
- Designed to increase fertility to 1st service
- Feed for up to 4 weeks
- Feeding rate 50h/hd day
- **Cost 4 cent/ewe/day(3p)**

BO PEEP LAMB BOOSTER

- Lamb creep in a bucket to complement instead of replacing grass, milk, sugar, Megalac, protein, molasses & Minerals
- Performance equal to creep in independent trials ****
- Feeding rate 25g/day
- **Cost 2 cent/lamb/day (1p)**

RUMEVITE

- Pressed barley, soya, minerals & much more for improved performance at little cost
- High in protein 20% plus & high in energy.

HIGH ENERGY EWE & LAMB

- High in protein
- Can be fed before or after lambing
- Ideal for out wintered ewe's
- Replaces up to 400g dry feed/day
- Feeding rate 150g/ewe/day
- **Cost 4 cent/ewe/day (2p)**

EXTRA HIGH ENERGY

- More natural protein & protected energy for bigger more vigorous lambs
- Replaces up to 500g/dry feed/ day
- Feeding rate 200g/ewe/day
- **Cost 5 cent/ewe/day (4p)**

SHEEP MINERAL

- High levels of cobalt & zinc
- Magnesium helps to control grass tetany
- Proven in trials in UCD
- Feeding rate 25g/ewe/day
- **Cost 1 cent/ewe/day (1p)**

CALF & BEEF

Extra weight gained at grass means less time on winter rations before finishing. Any deficiency will reduce growth. Minerals in late summer & autumn grass are less available than in spring grass. Put at least 2 buckets per paddock

CALF

- Up to 28kgs extra growth over summer**
- Feeding rate 25g/hd/day
- **Cost* 2 cent/hd/day (1p)**

**Cattle Only
Do Not Feed To Sheep**

BEEF BOOSTER

- Contains Deodorase for extra growth (65g/day in Grange trials)
- Feeding rate 100g/hd/day
- **Cost 10cent/hd/day (6p)**

**Cattle Only
Do Not Feed To Sheep**

SETTLEASE

- Immuno - stimulants, yeasts extracts & natural oils to help calves during stressful times such as weaning or after purchase

**Cattle only
Do Not Feed To Sheep**

FERTILITY RANGE

Any deficiency will reduce an animal's chance of conceiving or maintaining a viable pregnancy

VITAPHOS

- Very high in phosphorous.
- Over 20 yrs of success
- High levels of all trace elements
- Feeding rate 150g/hd/day
- **Cost* 10 cent/hd/day (10p)**

**Cattle Only
Do Not Feed To Sheep**
