

UNIBLOCK

THE BEST MINERAL LICK IN EVERY FIELD

COXXICALF®

Uniblock's Coxxicalf bucket is an anti-coccidia bucket designed for dairy calves post-weaning.

Various changes often take place around weaning such as change of diet, social group and housing. All of these factors lead to stress, and coccidiosis is an opportunist (a disease that develops when other stress factors are present).

Coxxicalf is a bucket based on seaweed, yeast and essential oils (poly phenols) all of these will improve calf rumen digestion, reduce protein degradability (which may reduce the energy required for ammonia excretion - so more for immunity) and have been shown to kill protozoa.

The life cycle of coccidiosis is approximately 21 days, therefore it is recommended that buckets are placed with animals before any risks of stress occurs.

Why Feed Coxxicalf?

- Anti-coccidia properties
- Full mineral supplementation at grass
- Reduces disease and ill-thrift
- Labour saving
- Cost Effective

Product Specification

Protein (%)	14
Oil (%)	3.5
Fibre (%)	0.1
Ash (%)	23
Calcium (%)	6
Phosphorus (%)	0.2
Magnesium (%)	0.1
Sodium (%)	2
Copper (CuSo4) (mg/kg)	540
Cobalt (mg/kg)	40
Iodine (mg/kg)	200
Selenium (mg/kg)	25
Manganese mg/kg	500
Zinc (mg/kg)	1000
Vitamin E (mg/kg)	100

How to Feed

- Place 1 x 10kg bucket per 10 to 15 calves
- 50 – 100g per day intakes
- Cost approx. 13 – 26 cent/head/day
- Position buckets near well trafficked areas such as drinking trough or sheltered area
- Check intakes regularly
