

UNIBLOCK

THE BEST MINERAL LICK IN EVERY FIELD

SHEEP MEGA BLOCK

Sheep Mega Block is a feed bucket manufactured by Uniblock to provide ewes with sufficient energy and protein plus all essential minerals and vitamins during the pre-partum period to support the pregnant ewe.

During Mid-pregnancy, (days 35-90) foetal growth is still minimal but essential placenta development is occurring, meaning if nutrition is compromised, then placental growth can be reduced. Crucially, if nutrition is compromised at this stage, then it cannot be compensated for in later pregnancy meaning lambs may be born smaller and at higher risk of mortality.

Uniblock's Coxxilamb bucket contains polyphenol plant extracts which have been scientifically proven to reduce coccidiosis in farm animals!!

Why Sheep Mega Block?

- Fulfils energy demand during pregnancy (M.E. 12mj/kgDM)
- Helps prevent twin lamb disease
- High quality protein sourced from soya bean meal (15% CP)
- Fully supplemented with minerals and trace elements to support a healthy immune system
- Costs just 10c/ewe/day
- Available in 20kg bucket

Product Specification

CP %	15
Fat %	7
M.E mj/KgDM	12
Fibre %	0.5
Calcium %	7
Magnesium %	2
Phosphorus %	0.2
Sodium %	3
Iodine mg/kg	20
Cobalt mg/kg	3
Manganese mg/kg	200
Zinc mg/kg	200
Selenium mg/kg	4
Vitamin E mg/kg	30

How to Feed

- Buckets should be placed close to a water source to encourage intakes.
- 1 bucket should last 20 ewes approx. 10 days
- Check intakes regularly
